

Brody Scholars Program Summer Enrichment Program Application

The Summer Enrichment experience is part of the Brody Scholars program. Its purpose is “to provide Brody Scholars with an opportunity to explore their individual interests and engage in activities that will enhance their professional development and provide future benefits to their fellow students and the community at large.” The program is open to all first year Brody Scholars. A total of \$14,000 is available (\$2,500 to \$3,500 per project). The experience must be initiated during the summer between the M1 and M2 years. Scholars should be aware that proposals dealing with service and education will be given priority over those involving research and travel.

All Brody Scholars who complete a Summer Enrichment experience are required to submit a concise (2-4 page) written report describing their Summer Enrichment Program activities and accomplishments. In addition, each participant will be expected to deliver a brief (10 minute maximum) oral presentation accompanied by a PowerPoint presentation at the October meeting of the Brody Foundation Board. Both items must be submitted within 30 days of the scholar’s return to Dawn Robinson-Little.

Since the Summer Enrichment Program is funded by the Brody Foundation, the report and presentation should demonstrate that the Foundation’s investment in the scholar’s education was justified. As such, it should be a succinct description of the scholar’s activities during the experience, along with an explanation of how the goals of the program (professional development, expected future benefits, etc.) were achieved. While a few comments of a personal, humorous, or extraneous nature are not prohibited, the report and presentation should primarily be professional in character and content.

To apply for the program, first year Brody Scholars need to complete the attached application form and return it to Dr. Bright in the Admissions Office by March 13, 2024. Students must submit their first choice and an alternative choice for a Summer Enrichment experience. Proposals will be reviewed, and preliminary decisions made by March 31, 2024. Proposed recipients will be recommended to the Brody Foundation for final approval in April, and selected Scholars will be notified within 5 days of approval by the board. While all proposals will be given serious consideration, there is no guarantee that all proposals will be funded. All scholars are required to sign the Liability Release-Waiver Form and return it to Dawn Robinson-Little no later than two weeks prior to traveling, **(No Exceptions)**.

The Brody Scholars Program works with the East Carolina University Office of Global Affairs (<http://www.ecu.edu/cs-acad/intlaffairs/index.cfm>) to organize and prepare students for international

travel. Each Brody Scholar preparing for an international SEP is required to complete online information modules in the 'Terra Dotta' program. These modules include information on travel clinic, vaccinations, prophylactic medications, the ISIC (International Student Identity Card), the AAMC Guidelines on students providing patient care abroad, FBI information on safety and security for US students traveling abroad, STEP (Smart Traveler Enrollment Program), 'green' travel information, using electronics abroad, and GEO-Blue overseas health insurance. All students are encouraged to register their trip with the US State Department so that they will receive notifications of any dangers that arise while traveling.

Brody Scholars planning an international Summer Enrichment Program should contact Katie Erickson in the ECU Office of Global Affairs at 252-238-1937 for guidance in completing the above modules.

Country Specific Travel Safety

The United States' Department of State Travel Warnings List represents guidelines as to the in-country safety of students. Under applicable University policy, BSOM students shall NOT travel to any country listed on the most recent travel warnings list. An appropriate summary of the in-country safety situation, and measures to assure safety, will be presented to the appropriate BSOM Administrator (the Associate Dean, Office of Medical Education) by the student and/or responsible faculty member. Without exception, Brody School of Medicine students shall follow the existing medical school and East Carolina University policies pertaining to potential rotations in countries on the Travel Warnings List.

United States Department of State Travel Warnings can be found at the following website:

<http://travel.state.gov/content/passports/english/alertswarnings.html>

If your destination is listed on the site regardless of it being a warning or alert, your proposal will be declined. Please monitor the site on a daily basis to ensure there has been no change. Although this has never happened to date, in the event you are approved to travel and your destination is subsequently added to the list following the approval, you will not be allowed to travel to that country. Once you have learned this has occurred, please contact Dawn Robinson-Little immediately either via email robinsonc@ecu.edu or direct line 252/744-3484 Dawn will assist you with the financial changes and contact both The Brody Foundation Board and Dr. Cedric Bright to make them aware of the situation. Selected students must comply with all appropriate university and BSOM policies related to travel and related activities.

Previous Summer Enrichment Recipients:

Class of 02 - Katherine Tayloe MacDonald	Medicine in Nicaragua
Class of 04 - W. Chris Taylor	International Student Leadership Program Belize
Class of 05 - Rasheeda Taliaferro Monroe	Medical Spanish & Physician Shadowing in Costa Rica
Class of 05 - Aimee Chung	Teaching Science to Disadvantaged Youths in Eastern NC
